

Bluewolf Beyond Product Picker

Data Sheet

The Agile Enterprise

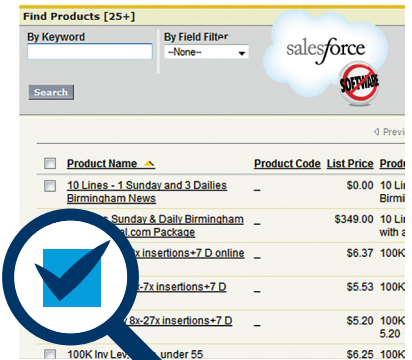

what is the product picker?

Bluewolf Beyond's Product Picker is an AppExchange solution designed to meet the unique needs of companies that offer more complex products and/or licensing models. This solution can be configured to help your organization add multiple products to an opportunity quickly and easily.

streamline complex pricing & product configuration inside salesforce crm

Built using Visualforce, Product Picker is a customizable solution that can be tailored to your company's unique product catalog, empowering your sales organization with a solution to accurately control product pricing and tracking.

- **Simple and fast.** Quickly find and add products to opportunities and directly configure properties, pricing, and discounts in line.
- **Easy to use.** Easily manage and edit multiple products within a quote from a single screen.
- **Error free.** Reduce data entry and boost accuracy through the use of robust filters and auto-complete features.
- **Built to fit.** A custom solution overlay to the Salesforce Product Object, we can build the Product Picker based on your organization's needs and requirements.
