

Bluewolf Beyond for Salesforce

Go beyond support for greater Salesforce ROI

You've implemented Salesforce. What comes next?

Conventional wisdom says you can keep your platform running with basic support, but that won't help you respond to the most common Salesforce challenges:

- Eliminating your backlog quickly.
- Prioritizing changes—and managing the political issues they create.
- Evolving the application when your business needs to shift.
- Implementing new features.
- Maximizing your ROI by continuing to innovate.

Savvy business leaders who want to overcome these challenges and seize new opportunities are turning to Bluewolf Beyond.

bluewolf™ Beyond
salesforce.com

"Bluewolf Beyond has dramatically helped us improve our instance of Salesforce... Its ongoing commitment to our success and program flexibility has made it more than just a business partner; it is like having extra staff in house working with and supporting our system."

Kevin Ko
Director of Information Systems
DriveCam

squeeze more value out of Salesforce

Bluewolf Beyond for Salesforce is a service that helps you sustain your innovation to achieve the highest levels of ROI. By subscribing to one simple plan, you maintain on-demand access to a complete team of Salesforce specialists with a diverse skill set.

With Bluewolf Beyond for Salesforce, you will go beyond technical support. You will receive:

- **Strategic Guidance** – Get more out of Salesforce by mapping application development to your business needs and driving user adoption. Bluewolf's automation strategists, business process analysts, change management professionals, and trainers can provide strategic oversight that keeps Salesforce working with your business—not against it.
- **Access to IT Skills On-Demand** – Major customizations often lie beyond the expertise of in-house IT staff. With more than a decade of Salesforce experience, our team of custom application developers, information architects, and Salesforce specialists will deliver the right technical skills at the right time.
- **Proactive Audits and Enhancements** – Your business is constantly changing—and so is Salesforce. Bluewolf Beyond helps you identify and integrate the new and enhanced features that will keep your application in sync with your needs.
- **ROI Tracking** – Learn how to digitize business processes in ways that make them more measurable. You'll gain the information you need to articulate the value of your Salesforce investment to your executives and peers.

take the next step

If you already have a Salesforce support program in place, you're getting the assistance you need with basic functionality issues. Bluewolf Beyond adds the next layer by providing best practices on business process issues and providing customization for your platform.

Contact Bluewolf today to get on-demand access to the experts who can help you go beyond basic support and use Salesforce to your competitive advantage.

about Bluewolf Beyond
